ABOUT THE EXHIBITION

We organize this unique event in the Kingdom of Saudi Arabia presenting a great opportunity to increase the knowledge for people with disabilities and the community around them. This exhibition showcases the latest technologies and developments that confirm that disabilities can be cured and treated correctly to overcome many life obstacles using creative methods and the appropriate rehabilitation equipment. In addition, it emphasizes the importance of the role that families play in making the lives of people with disabilities easier. The Saudi International Exhibition for Disability and Rehabilitation Requirements 2025 is a great opportunity to display the latest innovations and technologies in the industry of rehabilitation for people with disabilities. The exhibition highlights the role and responsibility of the community towards the needs and rights of individuals with disabilities, focusing on displaying solutions, services, and special needs. It is expected that this event features +150 local and international exhibitors and welcomes +10,000 visitors from all over the world.

THE VISION

The vision of The Saudi International Exhibition for Disability and Rehabilitation Requirements is to showcase and focus on all the required studies, research, laws and modern regulations related to people with disabilities and making them readily available to the concerned and interested investors in this field who will gather on one platform in this major event, which is considered to be the best in the region.

THE OBJECTIVES OF THE EXPO

- Embodying the Kingdom of Saudi Arabia 2030 vision in showing the importance of investing in the capabilities of people with disabilities and enabling them to integrate in the society by providing them with job opportunities. In addition, providing them with all the necessary requirements and means that will enable them to become an essential part of the society and individuals who are capable of serving their country and themselves.
- Meeting with (public/ private) local and international parties that manufactures or markets the requirements for people with disabilities or presents different forms of care and rehabilitation needed for them. In addition, presenting to them the necessary devices directly. Highlighting the importance of people with disabilities in the environment and social surroundings.

- Learning about the latest developments, research, systems and tools needed to meet the different needs for people with disabilities whether in: educational levels, treatment, recreation, technology, tourism, services or accommodation.
- Encouraging investments in different areas related to people with disabilities and providing all necessary requirements to ensure its success.

STATISTICS ON DISABILITY IN THE KINGDOM OF SAUDI ARABIA

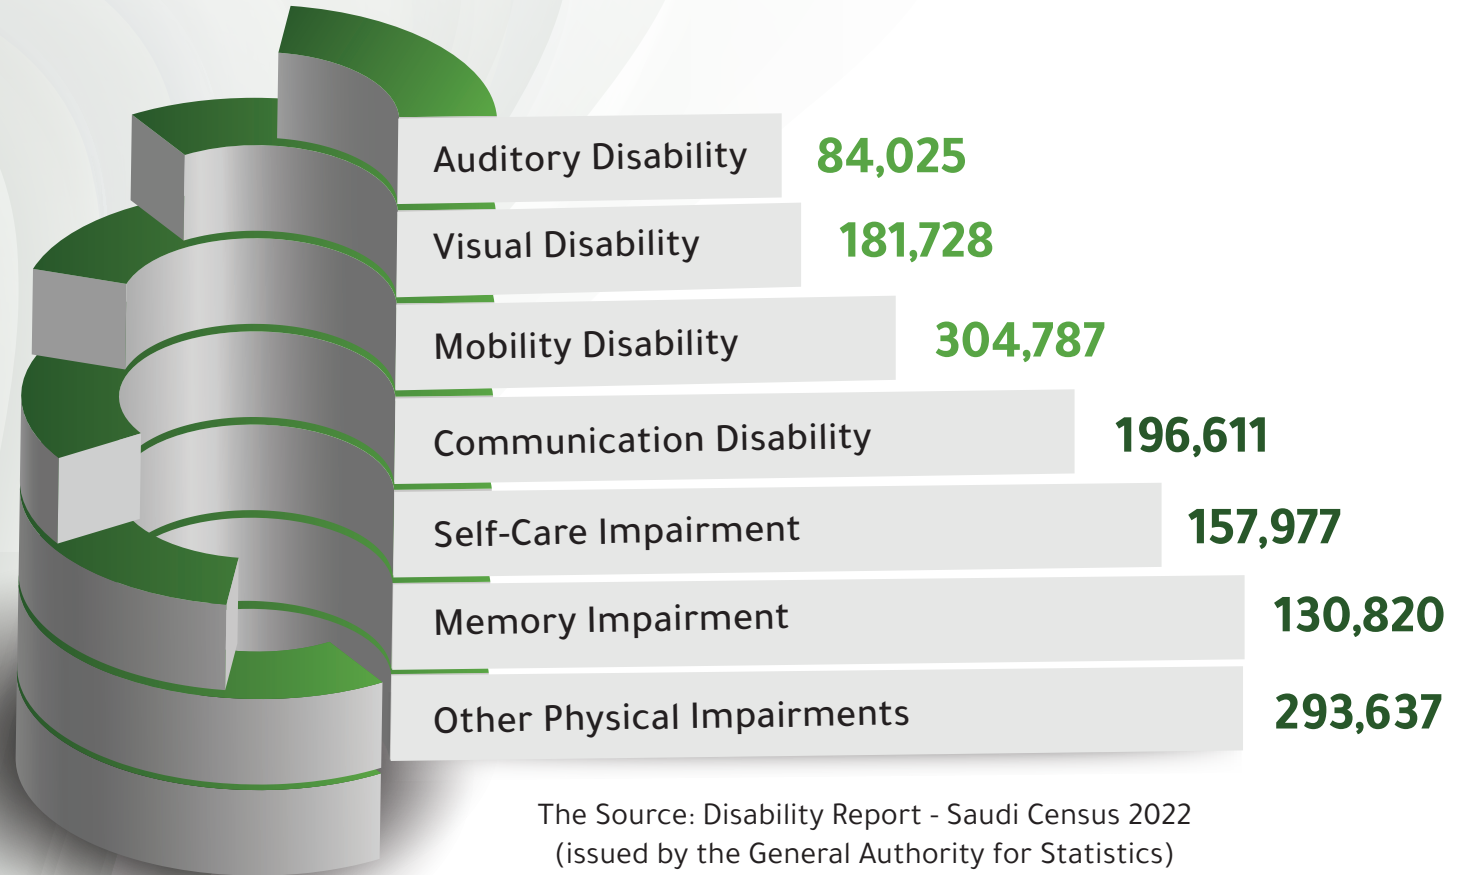

The proportion of people with disabilities in the Kingdom is 5.9% i.e. 1,349,585 individuals out of a total population of 32,175,224.
